

Sample Actuator *Curve*® plugged 2940L

- Module size: 49 mm x 40 mm x 3.3 mm
- Active length: 29 mm
- Module weight: 7.9 g
- Load range: up to 696 g at tip
→ with high cycling stability ≥ 200.000 cycles

- Dimensions of module size customizable
- Individual deflection
- Flexible mechanical and electrical interfaces
- Electrical resistivity can be modified
- All materials are RoHS-compliant

@ ≥100°C

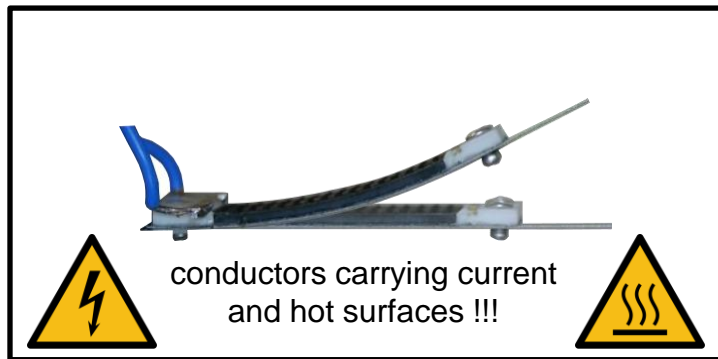

application notes on the back

Sample Actuator *Curve*® *plugged 2940L*

application notes

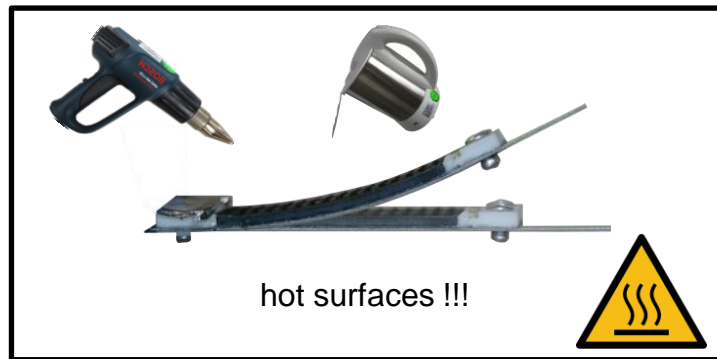

Curve plugged®

conductors carrying current
and hot surfaces !!!

Electrical resistivity: 1.2 Ω
**Actuation of a cooled down actuator
in calm air at 23°C**
moderate: 2.5 A for max. 45 s
fast: 3 A for max. 15 s

Curve unplugged®

hot surfaces !!!

Begin of actuation: ca. 60°C
End of actuation: ca. 100°C
Maximum temperature: 130°C

- **Current and time period only as a guide for a cooled down actuator in calm air at 23°C**
→ **Risk of overheating for subsequent activation** without adaption of current and time period
- To avoid damage do not exceed maximum temperature either electrical or thermal
- Uncontrolled electrical heating can lead to overheating → **risk of fire!**
- Operate exclusively with controllable power source in the SELV (safe extra-low voltage) range
